Reduce Cycle Time and Disruption that Bogs Down the Ability to Deliver Results

Successful team members faced with the need for innovative solutions to problems don't do the same thing at the same time. They do the right thing at the right time. This speeds up cycle time to create new products, services and solutions to problems. This course utilizes a self-assessment profile to identify their natural role towards innovation on a team, so that individual team member strengths can be fully utilized as needed. The 5 roles include:

- Creator
- Advancer
- Refiner
- Executor
- Flexer

Learning Outcomes

By the end of this course, participants will:

- Recognize how innovation on a team actually occurs
- Learn about the strengths of each team member role to enhance innovation
- Learn how to implement the “Z Process” to keep projects moving forward and avoid bottleneck that can tend to slow a team down
- Recognize when in the innovation process each role needs to be emphasized

Bonus Learning Resources Included with This Course

In addition to the live virtual course, participants will also receive:

- [Assessment: Team Dimensions Profile](#)
- On Demand eLearning Course: Using the Z Process to Reduce Cycle Time
- Whitepaper: 5 Strategies to Create an Innovative Culture
- Whitepaper: Tips for Innovative Leadership
- Daily Motivation Quotes
